

Erasmus+

NON Formal Environmental Education (NOFEE)

Erasmus+ Training Course
6 – 13 July 2015
Pissouri, Limassol, Cyprus

Participant Countries

Austria, Greece, Estonia, Romania, Bulgaria, Malta, Italy, Croatia and Cyprus

The Non Formal Environmental Education (NOFEE) project suggests the introduction and promotion of non formal techniques related with environmental education, through ways that will develop the creativity and entrepreneurship of the young participants.

A process which will have a positive effect not only on participants themselves, but on the whole European community as it will promote the essential environmental consciousness, which will eventually lead to a higher quality of life and will contribute in the reduction of unemployment, especially the one of young people through the potential establishment of new "green" business activities.

During an eight-day training workshop, youth workers, experts in environmental education, will try to interact with the participants and motivate them towards more innovative and eco-friendly ideas.

Three trainers, experts in non formal and also to environmental education will attempt to develop and transfer ideas about non formal education related with environmental issues.

The training will include three youth workers from each of the nine participating organizations who are environmentally concerned and work with young people either in their organizations or in their work and are willing to develop and learn new techniques about teaching with Non Formal Education (playing, acting, role playing and others) the environmental issues (caring about environment, protecting of the environment, renewable energy sources, biodiversity)

We are aiming in

- (a) Introducing new methods of non formal education related with the environment to the youth workers of the partner institutions,
- (b) Promoting the environmental awareness of young people,
- (c) Developing the right for a healthy environment and lifestyle for all people in the world,
- (d) Encouraging young people to engage in professions that have to deal with the environment, thus contributing to the problem of unemployment and
- (e) Increasing entrepreneurship among young people.

In addition, participants will improve key competences, such communication and learning skills and will strengthen their bonds with European citizens from different regions or countries. One of our side goals, of a more social dimension aspect, is to eliminate discrimination and racism among young people. This will be achieved by the fact that participants will be of different social status and from ten EU countries.

The proposed approaches can be applied from school teachers, NGOs, groups of environmentalists or even from local or national authorities in order to enhance the environmental awareness of young scholars and our aim is to inspire similar actions from other European countries.

Erasmus+

DAY 1. SUNDAY 5TH OF JULY 2015		
AM	Arrival of participants	
	Arrival of participants	
PM	Meeting each other through an interactive game – Ice Breaking	Interactive games for ice breaking
	Introduction to the training	Discussion and aims about the training, what the participants wants from the project
DAY 2. MONDAY 6TH OF JULY 2015		
AM	Green Energy and entrepreneurship	Presentation and discussion about green energy
	Creating my Green Company or Green Youth Project (Group Work 1)	Entrepreneurship of participants, through discussion, group work, role playing
PM	Calculate your carbon footprint	ICT, discussion in groups through observation
	Debate – Monoculture vs. Organic Farming	Debate in groups and discussion, certain rules
DAY 3. TUESDAY 7TH OF JULY 2015		
AM	Let Every Voice to Be Heard (Group Work)	Group Work, role playing, discussion in groups
	Building my Green Company or Green Youth Project (Group Work 2)	Role playing, working in groups, imagination and entrepreneurship
PM	Global Warming 1: Myth or Reality?	Group work, role playing, debate between groups, opposite sides
	Global Warming 2: Myth or Reality?	Group work, role playing, debate between groups, opposite sides, presentation in posters
DAY 4. WEDNESDAY 8TH OF JULY 2015		
AM	Fishermen	gaming activity, role playing, knowledge through observation, discussion between groups
	Web of life	gaming activity, metaphoric mean of environment and destruction of it, discussion
PM	Living in a perfect world	role playing, art, design, imagination, what we are willing to have, group discussion
	Finalizing my Green Company or Green Youth Project (Group Work 3)	Role playing, working in groups, imagination and entrepreneurship, discussion of danger
DAY 5. THURSDAY 9TH OF JULY 2015		
AM	Moja island 1	Game activity, role playing, critical thinking, knowledge from observation, group discussion
	Moja island 2	Game activity, role playing, critical thinking, final discussion from all
PM	Excursion to Paphos	photovoltaic energy park and wind generators, knowledge through observation and discussion
	Excursion to Paphos	We will have time to visit archeological places and Kato Paphos, multiculture knowledge
DAY 6. FRIDAY 10TH OF JULY 2015		
AM	Take a Step forward	Role playing, strong emotions against discrimination, discussion
	Representing my Green Company or Green Youth Project (Group Work 4)	Working in groups, imagination and entrepreneurship, representation in groups, discussion
PM	Environmental Exchange Box	Group Work, imagination, discussion, critical thinking
